

PROUD TO BE YOUR GUIDE™

Quintezz®
Alerter

GPS WARNING SYSTEM

- High-quality GPS receiver with 15.000 storage locations
- Warning for dangerous locations (e.g. speed camera) through GPS
- Extra warning in case of overspeed
- Warning distance: 600 and 300 meter
- The locations of many European countries can be downloaded through Internet
- Board computer with following functions:
 - Odometer (distance meter that starts from your own selected moment, e.g. how many kilometres you drive during your holiday)
 - Trip meter (distance of a ride)
 - Average speed
 - Real speed (based on GPS satellites)
 - Warning speed (warning in case of this speed violation)
 - Battery voltage
 - Compass with graphical and text indication
 - Date and time (very precise, based on GPS satellites)
- Possibility to add locations yourself and to exchange them with others
- Works in all cars thanks to external GPS antenna (no problem with metal film windshield, etc.)

OPTIONAL: TMC-receiver for real-time update on mobile speed cameras
